Container QRCode Format

QRCodes allow up to 4,000 bytes of information to be stored in a single machine readable barcode.

This page describes the format TapeTrack uses to store container and container content information.

Example

<sxh> :START:ARCHIVE:V1 :CREATED:2017-06-26@10:01 :SCOPE:ACME.LTO :CONTAINER:0000001 000001L3 000002L3 000003L3 000004L3 000005L3 000006L3 000007L3 000008L1 :SCOPE:ACME.3592 000003JB 000004JA 000005JA :END </sxh>
