Downloading and Installing the Software

32 and 64 Bit Versions

TapeTrack CheckPoint is available for both the 32-Bit and 64-Bit architectures. While the 32-Bit version will run on the x64 architecture, the 64-Bit version is recommended for use on a 64-Bit Windows Operating System.

Downloading the Software

The software can be downloaded from:

- 32-Bit
- 64-Bit

Installing the Software

The TapeTrack Check Point Software installs automatically via an InstallShield installer.
