Logon

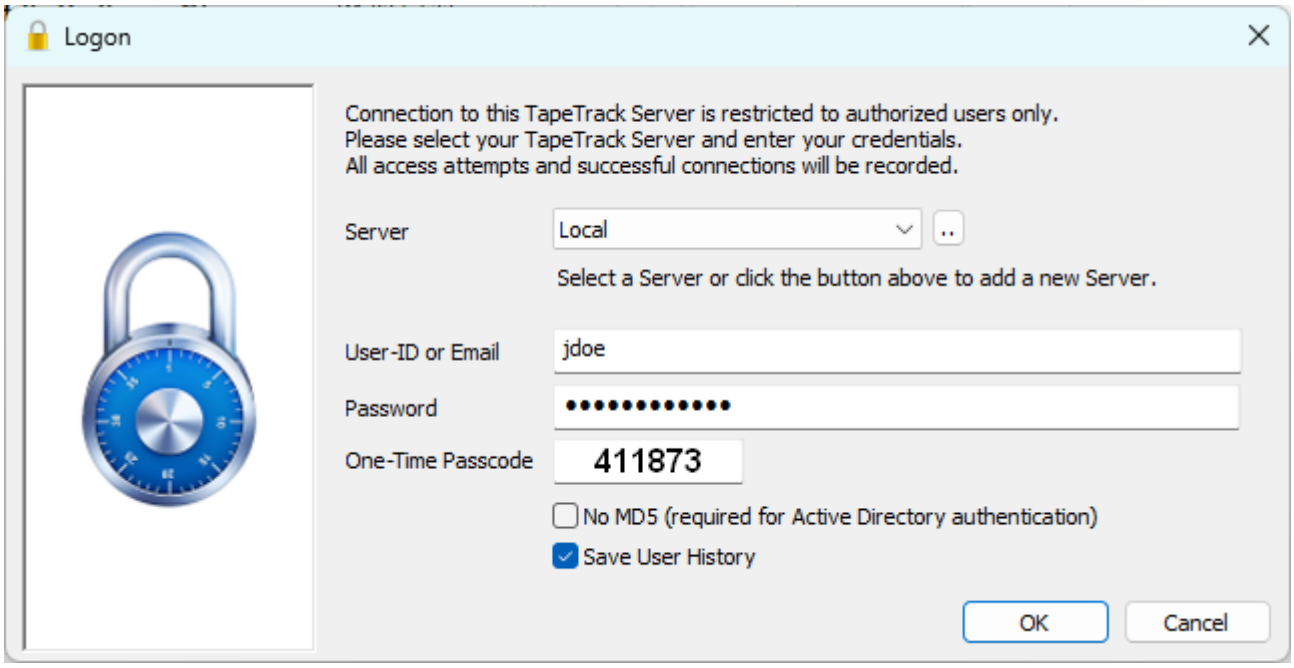

When you execute TapeTrack Checkpoint you will be presented with a splash screen for a short time and then the login window. If Checkpoint is already open, to open the login window select, from the main menu, `File` → `Login`.

Select your server from the dropdown menu.

Enter your user ID and password.

Check **No MD5** if using Active Domain Integration.

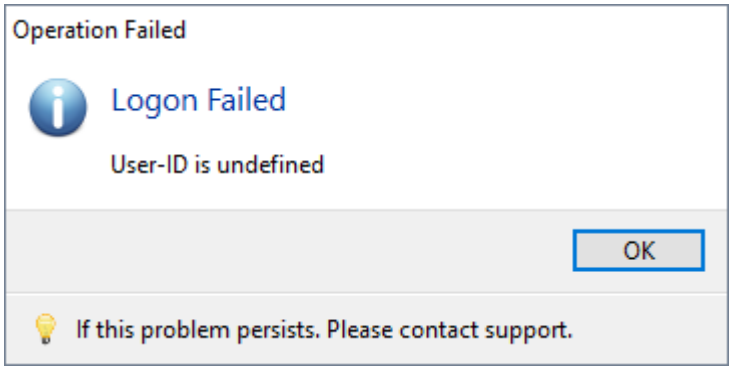

Click OK to login.

Login Errors

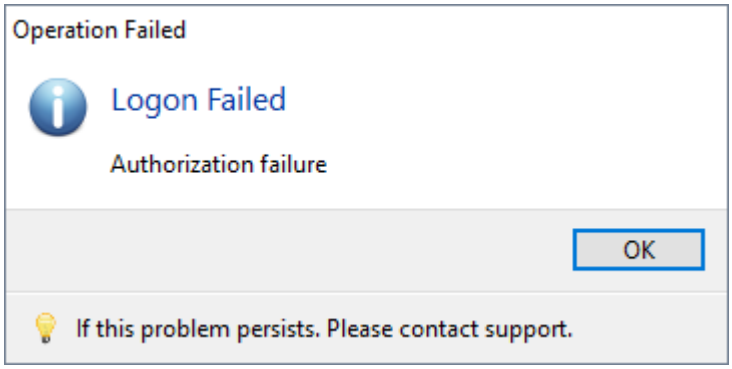

Incorrect User Name

If you enter an incorrect username you will see a popup saying **User Undefined**. Check to make sure your user name is correct before logging in.

Incorrect Password

If you enter an incorrect password you will see a popup saying **Logon Failed**. Ensure your password is typed in correctly.

After 4 incorrect logins, user access will be revoked as a security measure. To reactivate access your administrator will need to reset your password.
