# Server Information

The Server Information Window displays details of the server and the current connection.

To open the Server Information window select, from the main menu, `File` → `Server Information`.

## Server Information Window

There are four different panels in the **Server Information Window**:

- **Server Details**: The Server Information as defined by Framework Server License:
  - **Owner** name of TapeTrack Software

    - **Version** of TapeTrack Software currently installed.
- **Server Runtime Details**:
    - **Process-ID**
    - **Current Time**
    - **Start Time**
    - **Uptime**
- **Current User Information**: Displays information on the current User.
    - **User-ID**
    - **User Name**
    - **User Email**
- **Server Details**: Displays connection information pertaining to the current session.
    - **Requests**
    - **Bytes**
        - **Bytes Sent**
        - **Bytes Received**
    - **Compression**
        - **Sent**
        - **Received**
