Toolbar

The toolbar provides access to:

- **Customer Filter**: Filters which Customers are displayed in the Movement Tree.
- **Date Warning**: Warning of volumes with a next move within the time frame selected (default: No Warning).
- **Hide No Moves**: Movement Tree will only display Customers with Volumes in a move status.
- **Pick**: Scan mode to distribute volumes to another repository.
  - **Pick in volser order**: Changes scan order of volumes from slot order to volser order.
  - **Pick out of sequence**: Allows volumes to be picked out of list sequence without causing errors to be displayed.
- **Query**: Scan mode for receiving volumes from another repository.
- **Current Container**: In Pick mode, displays current Container ID to which scanned volumes are assigned to.
