db_hotbackup

Command line programs are executed via a Command Line Prompt or via a batch file. They cannot be executed by double clicking or right click run

Synopsis

```
db_hotbackup -h database directory -b output directory
```

Description

db_hotbackup creates a backup of the TapeTrack Framework Server database without the need to shut down the Framework Server.

The output files can then be zipped and saved to a secure location.

Options

The options which apply to the db_hotbackup command are:

- -h Database directory
- -b Directory for database backup to be written to

Exit Status

1. **zero** Program has ended successfully.
2. **non-zero** Program was unable to connect to the TapeTrack Framework Server.

This program is run via a batch file called `Backup.bat` located, by default, at `C:\Program Files\TapeTrack\TapeTrack Framework Server\bin\db`.

Example

```
@echo off
::
:: Object Type: DOS Batch Script
:: Description: TapeTrack Database Backup
::      System: TMSS
::    SecLevel: Proprietary
::   Copyright: (c) 2012 GazillaByte LLC
::
```

```
::
:: set the working directory to the TapeTrack Scripts directory so we can
use relative paths
::
cd "%TMSS10SCRIPTS%"

db_hotbackup -h "%TMSS10DB%" -b "%TMSS10BACK%"

exit
```
