db_hotbackup

Command line programs are executed via a Command Line Prompt or via a batch file. They cannot be executed by double clicking or right click run

Synopsis

```
db_hotbackup -h database directory -b output directory
```

db_hotbackup creates a backup of the TapeTrack Framework Server database while it is active or running.

This program is run via a batch file called `Backup.bat` located, by default, at `C:\Program Files\TapeTrack\TapeTrack Framework Server\bin\db`.
