# TMSS10ExpireDRStrategies

TMSS10ExpireDRStrategies will delete (or depreciate) all expired Disaster Recovery strategies within the specified date range.

## Synopsis

```
TMSS10ExpireDRStrategies [-C customer filter] [-D description filter] [-R
date range] [-S logon string] [-d depreciate] [-t test mode]
```

## Options

- `-C` Customer-ID filter.
- `-D` Description filter.
- `-R` Expiry date range.
- `-S` The Logon string argument sets the Server Logon Information.
- `-d` Depreciate Disaster Recovery Strategy rather than delete.
- `-t` Run in test mode, no updates performed.

If an argument value starts with the value `FI:`, the value for that attribute will be read from the file name specified immediately after it. For example, if a file named ACME_volumes has the content `ACME_*.*`, specifying `FI:/etc/ACME_volumes` will have the same effect as `-V ACME.*.*`. Using `FI:` to refer to a file for an attribute value works for all attributes.

If the pattern being matched starts with *LIST: then rather than matching the literal value, each record in the file specified as *LIST:filename will be tested. If one matches the match will succeed.

### Technical Support

The TapeTrack Software is commercially supported by a full time help desk staff.

If you are experiencing problems or want some advice on how to configure or use the product please see the Accessing Technical Support page.

### Exit Statuses

1. **zero** Program has ended successfully.
2. **non-zero** Program has not ended successfully.

### Environment

### Files

**stdout:** Output Reports.
**stderr:** Diagnostic messages.
**stdin:** Program input.

# Example

#### Command line syntax

```
TMSS10ExpireDRStrategies -S user:-password@server -C "US02" -R "M-1:m-1" -d
```

#### Output

```
