TMSS10ListClients

TMSS10ListClients lists all TapeTrack software that has connected to the TapeTrack Server within the specified date range.

Synopsis

```
TMSS10ListClients [-R date range] [-S logon string]
```

Options

- -R Specifies the date range.
- -S The Logon string argument sets the Server Logon Information.v

If an argument value starts with the value `FI:`, the value for that attribute will be read from the file name specified immediately after it. For example, if a file named ACME_volumes has the content ACME_*.*, specifying `FI:/etc/ACME_volumes` will have the same effect as `-V ACME.*.*`. Using `FI:` to refer to a file for an attribute value works for all attributes.

If the pattern being matched starts with *LIST: then rather than matching the literal value, each record in the file specified as *LIST:filename will be tested. If one matches the match will succeed.

Technical Support

The TapeTrack Software is commercially supported by a full time help desk staff.

If you are experiencing problems or want some advice on how to configure or use the product please see the Accessing Technical Support page.

Exit Statuses

1. **zero** Program has ended successfully.
2. **non-zero** Program has not ended successfully.

Environment

Files

stdout: Output Reports.

stderr: Diagnostic messages.
stdin: Program input.

Example

Command line syntax

```
TMSS10ListClients -S user:-password@server
```

Output

```
             System: TapeTrack
 Report Description: Client Usage
    Production Time: Monday, November 20, 2017 - 14:27:30 (AUS Eastern
Daylight Time)
       Report Width: 158 bytes
