

TMSS10ListClients

TMSS10ListClients lists all TapeTrack software that has connected to the [TapeTrack Server](#) within the specified date range.

Synopsis

```
TMSS10ListClients [-R date range] [-S logon string]
```

Options

- -R Specifies the date range.
- -S The Logon string argument sets the [Server Logon Information.v](#)

If an argument value starts with the value FI:, the value for that attribute will be read from the file name specified immediately after it. For example, if a file named ACME_volumes has the content ACME_*.*, specifying FI:/etc/ACME_volumes will have the same effect as -V ACME. *. *. Using FI: to refer to a file for an attribute value works for all attributes.

If the pattern being matched starts with *LIST: then rather than matching the literal value, each record in the file specified as *LIST:filename will be tested. If one matches the match will succeed.

Technical Support

The TapeTrack Software is commercially supported by a full time help desk staff.

If you are experiencing problems or want some advice on how to configure or use the product please see the [Accessing Technical Support](#) page.

Exit Statuses

1. **zero** Program has ended successfully.
2. **non-zero** Program has not ended successfully.

Environment

Files

stdout: Output Reports.

stderr: Diagnostic messages.
stdin: Program input.

Example

Command line syntax

```
TMSS10ListClients -S user:-password@server
```

Output

System: TapeTrack					
Report Description: Client Usage					
Production Time: Monday, November 20, 2017 - 14:27:30 (AUS Eastern Daylight Time)					
Report Width: 158 bytes					
Seq.	Product	MACID	Count	Last User	
Last Date	IP
