TMSS10ListConsignments

TMSS10ListConsignments lists all Consignments within the time threshold range.

Synopsis

```
TMSS10ListConsignments [-C customer filter] [-M threshold minutes] [-S logon string]
```

Options

- `-C` Customer-ID filter.
- `-M` Consignment threshold in minutes.
- `-S` The Logon string argument sets the Server Logon Information.

If an argument value starts with the value `FI:`, the value for that attribute will be read from the file name specified immediately after it. For example, if a file named ACME_volumes has the content `ACME_*.*`, specifying `FI:/etc/ACME_volumes` will have the same effect as `-V ACME.*.*`. Using `FI:` to refer to a file for an attribute value works for all attributes.

If the pattern being matched starts with *LIST: then rather than matching the literal value, each record in the file specified as *LIST:filename will be tested. If one matches the match will succeed.
