

TMSS10ListCustomers

TMSS10ListCustomers lists all Customer records, except hidden Customers, listing their Customer-ID, Description, current Volume count, Volume statistics and address.

Synopsis

```
TMSS10ListCustomers [-A attribute index] [-S logon string] [-V volume filter]
[-c configuration file]
```

Options

- -A Extended Attribute index (default = 0).
- -S The Logon string argument sets the [Server Logon Information](#).
- -V [Volume Filter](#) which can be used to filter the traversal of Customer, Media, Volume, repository and flag values.
- -c The config file argument specifies the path to the Batch Configuration File. The Batch Configuration File allows you to perform advanced traversal of [Customer](#), [Media](#) and [Volumes](#), perform advanced Barcode pre and post processing and route program output to syslogd.

If an argument value starts with the value FI:, the value for that attribute will be read from the file name specified immediately after it. For example, if a file named ACME_volumes has the content ACME_*.*, specifying FI:/etc/ACME_volumes will have the same effect as -V ACME.*.*. Using FI: to refer to a file for an attribute value works for all attributes.

If the pattern being matched starts with *LIST: then rather than matching the literal value, each record in the file specified as *LIST:filename will be tested. If one matches the match will succeed.

Technical Support

The TapeTrack Software is commercially supported by a full-time help desk staff.

If you are experiencing problems or want some advice on how to configure or use the product please see the [Accessing Technical Support](#) page.

Files

stdout: Output Reports.

stderr: Diagnostic messages.

Example

Command line syntax

<sxh> TMSS10ListCustomers -S user:-password@server </sxh>

Output

<sxh>

System: TapeTrack

Report Description: TapeTrack Customer Report

Production Time: Tuesday, August 11, 2020 - 09:57:10 (AUS Eastern Standard Time)
Report Width: 176 bytes
