

TMSS10ListCustomers

TMSS10ListCustomers lists all Customer records, except hidden Customers, listing their Customer-ID, Description, current Volume count, Volume statistics and address.

Synopsis

```
TMSS10ListCustomers [-A attribute index] [-S logon string] [-V volume filter]
[-c configuration file]
```

Options

- -A Extended Attribute index (default = 0).
- -S The Logon string argument sets the [Server Logon Information](#).
- -V [Volume Filter](#) which can be used to filter the traversal of Customer, Media, Volume, repository and flag values.
- -c The config file argument specifies the path to the Batch Configuration File. The Batch Configuration File allows you to perform advanced traversal of [Customer](#), [Media](#) and [Volumes](#), perform advanced Barcode pre and post processing and route program output to syslogd.

If an argument value starts with the value **FI:**, the value for that attribute will be read from the file name specified immediately after it. For example, if a file named **ACME_volumes** has the content **ACME_*. ***, specifying **FI:/etc/ACME_volumes** will have the same effect as **-V ACME. *. ***. Using **FI:** to refer to a file for an attribute value works for all attributes.

If the pattern being matched starts with ***LIST:** then rather than matching the literal value, each record in the file specified as ***LIST:filename** will be tested. If one matches the match will succeed.

[include page](#)

To include multiple Attributes in the report, add the required Attribute indexes separated by a comma (eg. -A 1,2,5).

Technical Support

The TapeTrack Software is commercially supported by a full-time help desk staff.

If you are experiencing problems or want some advice on how to configure or use the product please see the [Accessing Technical Support](#) page.

Files

stdout: Output Reports.
stderr: Diagnostic messages.

Example

Command line syntax

```
TMSS10ListCustomers -S user:-password@server
```

Output

System: TapeTrack
Report Description: TapeTrack Customer Report
Production Time: Tuesday, August 11, 2020 - 09:57:10 (AUS Eastern Standard Time)
Report Width: 176 bytes

ID	Description	Count	Move	Overdu	Audit
