TMSS10ListDRStrategies

TMSS10ListDRStrategies lists the DR strategies, along with included Volume information within each DR strategy.

Synopsis

```
TMSS10ListDRStrategies [-A attribute index] [-C customer filter] [-D
description] [-S logon string]
```

Options

- -A Specifies the Attribute index.
- -C Customer-ID filter.
- -D Description filter.
- -S The Logon string argument sets the Server Logon Information.

If an argument value starts with the value `FI:`, the value for that attribute will be read from the file name specified immediately after it. For example, if a file named ACME_volumes has the content `ACME_*.*`, specifying `FI:/etc/ACME_volumes` will have the same effect as `-V ACME.*.*`. Using `FI:` to refer to a file for an attribute value works for all attributes.

If the pattern being matched starts with *LIST: then rather than matching the literal value, each record in the file specified as *LIST:filename will be tested. If one matches the match will succeed.

include page

To include multiple Attributes in the report, add the required Attribute indexes separated by a comma (eg. -A 1,2,5).

Technical Support

The TapeTrack Software is commercially supported by a full time help desk staff.

If you are experiencing problems or want some advice on how to configure or use the product please see the Accessing Technical Support page.

Exit Statuses

1. **zero** Program has ended successfully.

2. **non-zero** Program has not ended successfully.

Environment

Files

stdout: Output Reports.
stderr: Diagnostic messages.
stdin: Program input.

Example

Command line syntax

```
TMSS10ListDRStrategies -S user:-password@server -C "US02" -D "LA*" -A 1
```

Output

```
            System: TapeTrack
 Report Description: Disaster Recovery Strategy List
       Report Notes: Customer-ID(US02) Description(Los Angeles Data Center)

       Report Width: 102 bytes

 Description                              Created             Expiry
