# TMSS10ListDRStrategies

TMSS10ListDRStrategies lists the DR strategies, along with included Volume information within each DR strategy.

## Synopsis

```
TMSS10ListDRStrategies [-A attribute index] [-C customer filter] [-D
description] [-S logon string]
```

## Options

- -A Specifies the Attribute index.
- -C Customer-ID filter.
- -D Description filter.
- -S The Logon string argument sets the Server Logon Information.

If an argument value starts with the value `FI:`, the value for that attribute will be read from the file name specified immediately after it. For example, if a file named ACME_volumes has the content `ACME_*.*`, specifying `FI:/etc/ACME_volumes` will have the same effect as `-V ACME.*.*`. Using `FI:` to refer to a file for an attribute value works for all attributes.

If the pattern being matched starts with *LIST: then rather than matching the literal value, each record in the file specified as *LIST:filename will be tested. If one matches the match will succeed.

To include multiple Attributes in the report, add the required Attribute indexes separated by a comma (eg. -A 1,2,5).
