

TMSS10ListMoveHistory

Synopsis

```
TMSS10ListMoveHistory [-A audit flag] [-H hours] [-M moving volumes] [-S  
logon string] [-T target repository] [-V volume filter] [-c configuration  
file]
```

Description

TMSS10ListMoveHistory lists the movement history of each volume within the specified time frame.

Options

- -A Sets audit flag when volume overdue.
- -H Number of hours to go back in time (default 24 Hours).
- -M Include all moving volumes.
- -S The Logon string argument sets the [Server Logon Information](#).
- -T Target repository filter.
- -V [Volume Filter](#) which can be used to filter the traversal of Customer, Media, Volume, repository and flag values.
- -c The config file argument specifies the path to the Batch Configuration File. The Batch Configuration File allows you to perform advanced traversal of Customer, Media and Volumes, perform advanced Barcode pre and post processing and route program output to syslogd.

If an argument value starts with the value FI:, the value for that attribute will be read from the file name specified immediately after it. For example, if a file named ACME_volumes has the content ACME_*.*, specifying FI:/etc/ACME_volumes will have the same effect as -V ACME.*.*. Using FI: to refer to a file for an attribute value works for all attributes.

If the pattern being matched starts with *LIST: then rather than matching the literal value, each record in the file specified as *LIST:filename will be tested. If one matches the match will succeed.

2025/01/21 22:08

[include page](#)

To include multiple Attributes in the report, add the required Attribute indexes separated by a comma (eg. -A 1,2,5).

Technical Support

The TapeTrack Software is commercially supported by a full time help desk staff. If you are experiencing problems or want some advice on how to configure or use the product please see the [Accessing Technical Support](#) page.

Exit Statuses

- 1. **zero** Program has ended successfully.
- 2. **non-zero** Program has not ended successfully.

Environment

Files

stdout: Output Reports.
stderr: Diagnostic messages.
stdin: Program input.

Example

Command line syntax

<sxh> TMSS10listMoveHistory -S user:-password@server -V "US02.LTO.*" -H 48 -T "OFFS" </sxh>

Output

<sxh>

System: TapeTrack

Report Description: User Scan Report

Report Notes: Period 2017-11-18 11:47:11 through 2017-11-20 11:47:11
Production Time: Monday, November 20, 2017 - 11:47:11 (AUS Eastern Daylight Time)
Report Width: 96 bytes
