

# TMSS10ListRepositories

TMSS10ListRepositories list the Current status of each [Repository](#) including Capacity, Usage, Incoming [Volumes](#), Outgoing [Volumes](#) and Assigned Slots.

## Synopsis

```
TMSS10ListRepositories [-S logon string] [-V volume filter]
```

## Options

- -R Specifies the date range.
- -S The Logon string argument sets the [Server Logon Information](#).
- -V [Volume Filter](#) which can be used to filter the traversal of [Customer](#), [Media](#), [Volume](#), [Repository](#) and [Flag](#) values.

If an argument value starts with the value FI:, the value for that attribute will be read from the file name specified immediately after it. For example, if a file named ACME\_volumes has the content ACME\_\*.\*, specifying FI:/etc/ACME\_volumes will have the same effect as -V ACME.\*.\*. Using FI: to refer to a file for an attribute value works for all attributes.

If the pattern being matched starts with \*LIST: then rather than matching the literal value, each record in the file specified as \*LIST:filename will be tested. If one matches the match will succeed.

## Technical Support

The TapeTrack Software is commercially supported by a full time help desk staff.

If you are experiencing problems or want some advice on how to configure or use the product please see the [Accessing Technical Support](#) page.

## Exit Statuses

1. **zero** Program has ended successfully.
2. **non-zero** Program has not ended successfully.

## Environment

# Files

**stdout:** Output Reports.  
**stderr:** Diagnostic messages.  
**stdin:** Program input.

## Example

### Command line syntax

```
TMSS10ListRepositories -S user:-password@server -V "US02.LT0.*"
```

### Output

|                                                                                   |                   |         |       |     |          |             |           |      |               |        |             |          |
