TMSS10ListStorageHistory

TMSS10ListStorageHistory lists the Storage History for each Repository within the specified date range.

Synopsis

```
TMSS10ListStorageHistory [-R date range] [-S logon string] [-V volume filter]
```

Options

- -R Specifies the date range.
- -S The Logon string argument sets the Server Logon Information.
- -V Volume Filter which can be used to filter the traversal of Customer, Media, Volume, Repository and Flag values.

If an argument value starts with the value `FI:`, the value for that attribute will be read from the file name specified immediately after it. For example, if a file named ACME_volumes has the content `ACME_*.*`, specifying `FI:/etc/ACME_volumes` will have the same effect as `-V ACME.*.*`. Using `FI:` to refer to a file for an attribute value works for all attributes.

If the pattern being matched starts with *LIST: then rather than matching the literal value, each record in the file specified as *LIST:filename will be tested. If one matches the match will succeed.
