TMSS10Mirror

TMSS10Mirror will replicate location information from one TapeTrack Server to another.

Synopsis

```
TMSS10Mirror [-P phases] [-S logon string] [-c configuration file]
```

Options

- `-P` Phases to execute.
- `-S` The Logon string argument sets the Server Logon Information.
- `-c` The config file argument specifies the path to the Batch Configuration File. The Batch Configuration File allows you to perform advanced traversal of Customer, Media and Volumes, perform advanced Barcode pre and post processing and route program output to syslogd.

If an argument value starts with the value `FI:`, the value for that attribute will be read from the file name specified immediately after it. For example, if a file named ACME_volumes has the content `ACME_*.*`, specifying `FI:/etc/ACME_volumes` will have the same effect as `-V ACME.*.*`. Using `FI:` to refer to a file for an attribute value works for all attributes.

If the pattern being matched starts with *LIST: then rather than matching the literal value, each record in the file specified as *LIST:filename will be tested. If one matches the match will succeed.

Technical Support

The TapeTrack Software is commercially supported by a full time help desk staff.

If you are experiencing problems or want some advice on how to configure or use the product please see the Accessing Technical Support page.

Exit Statuses

1. **zero** Program has ended successfully.
2. **non-zero** Program has not ended successfully.

Environment

Files

stdout: Output Reports.
stderr: Diagnostic messages.
stdin: Program input.

Example

Config File

mirror.cfg contains the IP address of the mirror server as well as the user/password to login in.

```
traversal =
{
   customer =
   (
      {
         id = "*";
         media =
         (
            {
                id = "*";
                remote =
                {
                    address="mirror_server.tapetrack.com";
                    userid="mirror_user";
                    password="mirror_password";
                };
             }
         );
      }
   );
};
```

Command line syntax

```
TMSS10Mirror -S user:-password@server -c "C:\Program
Files\TapeTrack\TapeTrack Framework Server\etc\mirror.cfg"
```

Output

Mirror Report (Detail)

<sxh plain;>

```
           System: TapeTrack
```

Report Description: Mirror Report (Detail)

```
     Report Notes: Local Customer(Nashville Data Center) Media(LTO
Cartridge)
  Production Time: Thursday, April 19, 2018 - 11:26:51 (AUS Eastern Standard
Time)
     Report Width: 163 bytes
```
