

# TMSS10MoveDateList

TMSS10MoveDateList lists all volumes that are set to move within the specified date range.

## Synopsis

```
TMSS10MoveDateList [-S logon string] [-V volume filter] [-c configuration file] [-e expiry] [-r range]
```

## Options

- -S The Logon string argument sets the [Server Logon Information](#)
- -V [Volume Filter](#) which can be used to filter the traversal of [Customer](#), [Media](#), [Volume](#), [Repository](#) and [Flag](#) values.
- -c The config file argument specifies the path to the Batch Configuration File. The Batch Configuration File allows you to perform advanced traversal of [Customer](#), [Media](#) and [Volumes](#), perform advanced Barcode pre and post processing and route program output to syslogd.
- -e Use expiry date rather than Next move date: default = false
- -r Day range, 0 = all, -n = Last n entries in list, +n = First n entries in list.

If an argument value starts with the value FI:, the value for that attribute will be read from the file name specified immediately after it. For example, if a file named ACME\_volumes has the content ACME\_\*.\*, specifying FI:/etc/ACME\_volumes will have the same effect as -V ACME. \*. \*. Using FI: to refer to a file for an attribute value works for all attributes.

If the pattern being matched starts with \*LIST: then rather than matching the literal value, each record in the file specified as \*LIST:filename will be tested. If one matches the match will succeed.

## Notes

Report-ID: 106

## Technical Support

The TapeTrack Software is commercially supported by a full time help desk staff. If you are experiencing problems or want some advice on how to configure or use the product please see the [Accessing Technical Support](#) page.

## Exit Statuses

- 1. **zero** Program has ended successfully.
- 2. **non-zero** Program has not ended successfully.

## Environment

## Files

**stdout:** Output Reports.  
**stderr:** Diagnostic messages.  
**stdin:** Program input.

## Example

### Command line syntax

```
TMSS10MoveDateList -S user:-password@server -r "-3" -V "US02.*.*"
```

### Output

System: TapeTrack  
Report ID: 106  
Report Description: Volume Movement Prediction List  
Report Notes: Movement Date(Monday, November 27, 2017)  
Production Time: Thursday, November 23, 2017 - 12:09:05 (AUS Eastern Daylight Time)  
Report Width: 81 bytes

| Seq. | Barcode           | Repository | Location |
|------|-------------------|------------|----------|
| 1    | US02.LT0.000010L6 | Library    | No-Alloc |

System: TapeTrack  
Report ID: 106  
Report Description: Volume Movement Prediction List  
Report Notes: Movement Date(Tuesday, November 28, 2017)  
Production Time: Thursday, November 23, 2017 - 12:09:05 (AUS Eastern Daylight Time)  
Report Width: 81 bytes

| Seq. | Barcode | Repository | Location |
|------|---------|------------|----------|
|------|---------|------------|----------|
