TMSS10PasswordResetDB

Synopsis

```
TMSS10PasswordReset [-i ] [-h database directory] [-p new password] [-u user for reset]
```

Description

Allows a user with administrative rights to reset a users password and restore user access when access has been revoked due to multiple consecutive failed login attempts.

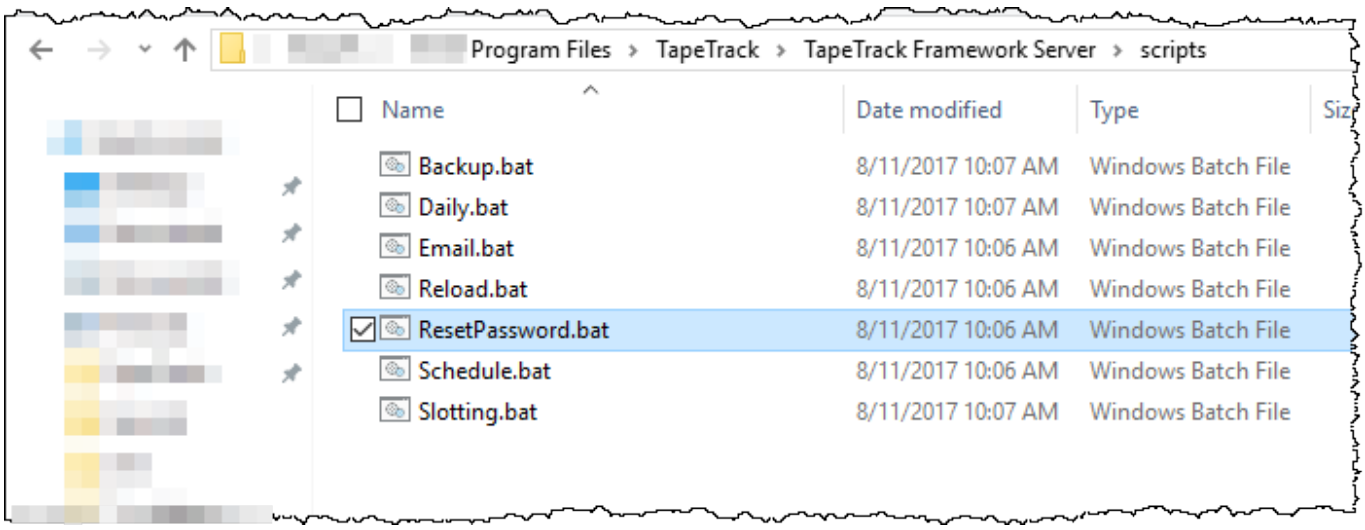

Options

- -h Database home directory.
- -i interactive mode true.
- -p New password value.
- -u User to reset.

Notes

TMSS10PasswordResetDB can be invoked through the script **ResetPassword.bat** which will automatically run TMSS10PaswordResetDB in interactive mode and set the database home directory and working directory via the variables %TMSS10SCRIPTS% and %TMSS10DB% (set at install). This is the recommended method to invoke resetting passwords.

ResetPassword.bat can be found in the **TapeTrack** install directory under **TapeTrack\TapeTrack Framework Server\scripts**

Technical Support

The TapeTrack Software is commercially supported by a full time help desk staff. If you are experiencing problems or want some advice on how to configure or use the product please see the Accessing Technical Support page.
