

TMSS10PasswordResetDB

Synopsis

TMSS10PasswordReset [-i] [-h database directory] [-p new password] [-u user for reset]

Description

Allows a user with administrative rights to reset a users password and restore user access when access has been revoked due to multiple consecutive failed login attempts.

Options

- -h Database home directory.
- -i interactive mode true.
- -p New password value.
- -u User to reset.

Notes

TMSS10PasswordResetDB can be invoked through the script ResetPassword.bat which will:

1. call TMSS10PaswordResetDB in interactive mode,
2. set the database home directory and working directory via the variables %TMSS10SCRIPTS% and %TMSS10DB% (set at install).

ResetPassword.bat can be found in the **TapeTrack** install directory under TapeTrack\TapeTrack Framework Server\scripts

Technical Support

The TapeTrack Software is commercially supported by a full time help desk staff. If you are experiencing problems or want some advice on how to configure or use the product please see the [Accessing Technical Support](#) page.

Exit Statuses

- 1. **zero** Program has ended successfully.
- 2. **non-zero** Program has not ended successfully.

Environment

Example

Running `TMSS10PasswordReset.bat` to invoke `TMSS10PasswordResetDB`.
