Sample Slotting Script

A sample slotting script to execute TMSS10SlotAllocation can be found in your TapeTrack Install at TapeTrack\TapeTrack Framework Server\scripts

This script will allocate a volume to a vacant slot that is in a location eligible for slotting.

Scheduling

While it is possible to execute this scrip manually when required, it is recommended that this script be scheduled to run every 5 minutes.

Sample Script

<sxh>

TMSS10SlotAllocation -S user:-password@localhost > “%TMSS10REPORTS%\slotting_report.txt” 2> “%TMSS10REPORTS%\slotting_error.txt” </sxh>
