

TMSSBatch

TMSSBatch will open the TapeTrack Batch Utility, allowing simplified input of information to create a batch file for execution of a command line utility executable, including input of arguments, input files and specification of the working directory.

Options

- **A Program variables**
 - **Executable Path** Full directory path to selected executable (non editable).
 - **Executable Program** Target executable program.
 - **Arguments** Arguments required for executable.
- **B Environmentable Variables**
 - **Stdin File** directory path and file for input to stdin if required.
 - **Environment** Environment variables if required (e.g. TMSSNOMD5).
 - **Working Directory** Working directory to load and/or save settings to/from.
- **C Logging**
 - **Log File** Directory path to save log file to.
- **D Control Buttons**
 - **Load** Load variables from file.

- **Save** Save current variables to file.
- **Open Log** Open current log file.
- **E Message Tabs**
 - **Program Output** Output from executed batch file, from stdout.
 - **Program Messages** Output from executed batch files, from stderr.
- **F Display Panel** Display panel for batch file output.
- **G Control Buttons**
 - **Run** Execute batch file script.
 - **Cancel** Exit Batch Utility.

Technical Support

The TapeTrack Software is commercially supported by a full time help desk staff. If you are experiencing problems or want some advice on how to configure or use the product please see the [Accessing Technical Support](#) page.

Exit Statuses

1. **zero** Program has ended successfully.
2. **non-zero** Program has not ended successfully.
