Batch Volume Filter

Syntax

```
customer_filter.media_filter.volume_filter@repository_filter+flags!flags
```

- `customer_filter`
- `media_filter`
- `volume_filter`
- `repository_filter`
- `flags` allow you to filter volume flag values, where + is set flags, and `!` are unset flags.

Examples

List all LTO Volumes in the off-site repository that are scratch and not encrypted.

```
-V "*.LTO.*@OFFS+Z!E"
```
