

# Batch Volume Filter

## Syntax

```
customer_filter.media_filter.volume_filter@repository_filter+flags!flags
```

- customer\_filter
- media\_filter
- volume\_filter
- repository\_filter
- flags allow you to filter [volume flag](#) values, where + is set flags, and ! are unset flags.

## Examples

List all LTO Volumes in the offsite repository that are scratch and not encrypted.

```
-V "*.LTO.*@OFFS+Z!E"
```
