

Batch Volume Filter

Syntax

```
customer_filter.media_filter.volume_filter@repository_filter+flags!flags
```

- customer_filter
- media_filter
- volume_filter
- repository_filter
- flags allow you to filter [volume flag](#) values, where + is set flags, and ! are unset flags.

Examples

List all LTO Volumes in the offsite repository that are scratch and not encrypted.

```
<sxh> -V "*.LTO.*@OFFS+Z!E" </sxh>
```
