Billing and Charge-back

TapeTrack has a powerful billing and charge-back engine.

The engine is comprised of:

1. A billing extract module.
2. A billing calculation module.
3. Third-party interfaces such as the TapeTrack Quickbooks Interface.

The Extract Module

The purpose of the Billing Extract module TMSS10LogStatsExtractDB is to read through the TapeTrack history tables and create billing extract files that match the date range specified when the program is called.

At the completion of the program you will have one ttstats file for each TapeTrack customer.
