

Adding Long Barcode To Attribute Automatically

When adding hashed Long Barcodes to TapeTrack, the unhashed Barcode can be automatically added to the Volume's Description or an Extended Attribute to allow a human readable along side the hashed value.

Adding An Extended Attribute For Long Barcode

If you are adding the unhashed Barcode to the Volume field Description or you have already added the required Extended Attribute you can skip this section.

Extended Attributes are added at a Customer level and are then available to all Media types that belong to that Customer.

To add an Extended Attribute, right-click the required Customer-ID from the Customer Tree and select Properties.

From the Edit Customer window, select the Attributes tab.

False

Left-click in the first available blank Attribute Name field .

Enter a descriptive name for the Attribute (eg. Long Barcode), leaving the Type as String.

From the Edit Customer window, select the Options tab. From the Long Barcode Attribute field, select the Attribute filed you want the un-hashed Long Barcode to be added to (eg. Long barcode).
