

Adding Long Barcode To Attribute Automatically

When adding hashed Long Barcodes to TapeTrack, the unhashed Barcode can be automatically added to the Volume's Description or an Extended Attribute to allow a human readable along side the hashed value.

Adding An Extended Attribute For Long Barcode

If you are adding the unhashed Barcode to the Volume field Description or you have already added the required Extended Attribute you can skip this section.

Extended Attributes are added at a Customer level and are then available to all Media types that belong to that Customer.

To add an Extended Attribute, right-click the required Customer-ID from the Customer Tree and select Properties.

From the Edit Customer window, select the Attributes tab.

The screenshot shows the 'Edit Customer' window with the 'Attributes' tab selected. The 'Extended Attribute 1' is named 'Long barcode' with Type 'String' and Required 'False'. The other two extended attributes are blank.

Attribute	Name	Type	Required
Extended Attribute 1	Long barcode	String	False
Extended Attribute 2		String	False
Extended Attribute 3		String	False

Left-click in the first available blank Extended Attribute field Name .

Enter a descriptive name for the Attribute (eg. Long Barcode), leaving the Type as String.

From the Edit Customer window, select the Options tab. From the Long Barcode Attribute field, select the Attribute filed you want the un-hashed Long Barcode to be added to (eg. Long barcode).

The screenshot shows the 'Edit Customer' window with the 'Options' tab selected. The 'Long Barcode Attribute' dropdown is open, showing 'Long Barcode' as the selected option. The other options are '<Not Selected>' and 'Description'.

Option	Value
Hide Customer	False
Disallow Customer Duplicates	False
Disallow Global Duplicates	False
Volume Lock	False
Hide No Children	False
Allowable Media-ID Filter	
Maximum number of Media-IDs	0
Holiday Group	
Customer Category	0
Parent Customer	
Account Number	0
Long Barcode Attribute	Long Barcode

Click Save.

Scanning Long Barcodes

Scan Long Barcodes, by right-clicking in the Inventory window and selecting **Special Operations** → **Scan** → **Scan To Add Volumes** and Scan-In the Volumes using your preferred method.

All Volumes Scanned with Long Barcodes will automatically have the un-hashed barcode value added to the Extended Attribute selected in the previous steps.

To view the Extended Attribute (Long Barcode) in TapeMaster, from the main menu select **View** → **Volume List Properties**.

Select from the **Attribute Field**, under **List Options**, the required Attribute (Long Barcode). The values will now display in the Inventory window.
