

Adding Long Barcode Values To Extended Attributes

When adding hashed Long Barcodes to TapeTrack, the unhashed Barcode can be automatically added to the Volume's Description or an [Extended Attribute](#) to allow a human readable along side the hashed value.

Sample Data

In this example we will use the following Volume-ID's to scan into TapeMaster

- VOLUME_1001
- 100010002234
- MONDAY VOLUME 1

Adding [Extended Attribute](#) Long Barcode

Adding An Extended Attribute For Long Barcode

If you are adding the unhashed Barcode to the Volume field Description or you have already added the required [Extended Attribute](#) you can skip this section.

[Extended Attributes](#) are added at a [Customer](#) level and are then available to all [Media](#) types that belong to that [Customer](#).

To add an [Extended Attribute](#), right-click the required Customer-ID from the Customer Tree and select Properties.

From the Edit [Customer](#) window, select the [Attributes](#) tab.

The screenshot shows the 'Edit Customer' window with the 'Attributes' tab selected. The 'Extended Attribute 1' section is expanded, displaying the following details:

Extended Attribute 1	
Name	Long barcode
Type	String
Required	False

Below this, 'Extended Attribute 2' and 'Extended Attribute 3' are also visible but not expanded.

Left-click in the first available blank [Extended Attribute](#) field Name .

Enter a descriptive name for the [Extended Attribute](#) (eg. Long Barcode), leaving the Type as String.

From the Edit [Customer](#) window, select the [Options](#) tab. From the Long Barcode Attribute field, select the [Extended Attribute](#) field you want the un-hashed Long Barcode to be added to (eg. Long barcode).

The screenshot shows the 'Edit Customer' window with the 'Options' tab selected. The 'Long Barcode Attribute' field is highlighted, and its dropdown menu is open, showing the following options:

- <Not Selected>
- Description
- Long Barcode

A mouse cursor is pointing at the 'Long Barcode' option.

Click Save.

Scanning Long Barcodes

Scan Long Barcodes, by right-clicking in the Inventory window and selecting Special Operations
→ Scan → Scan To Add Volumes

Scan-In the Volumes using your preferred method.

All Volumes Scanned with Long Barcodes will automatically have the un-hashed barcode value added to the [Extended Attribute](#) selected in the previous steps.

Viewing Long Barcode Values

To view the [Extended Attribute](#) (Long Barcode) in TapeMaster, from the main menu select View → Volume List Properties.

Select from the Attribute Field, under List Options, the required Attribute (Long Barcode). The un-hashed Long Barcode values will now display in the Inventory window.
