Restore Previous Date

Adding a Restore Previous Date Simple Management Rule to a Repository will maintain the Next Move Date currently applied to the Volumes when moved to the Target Repository.

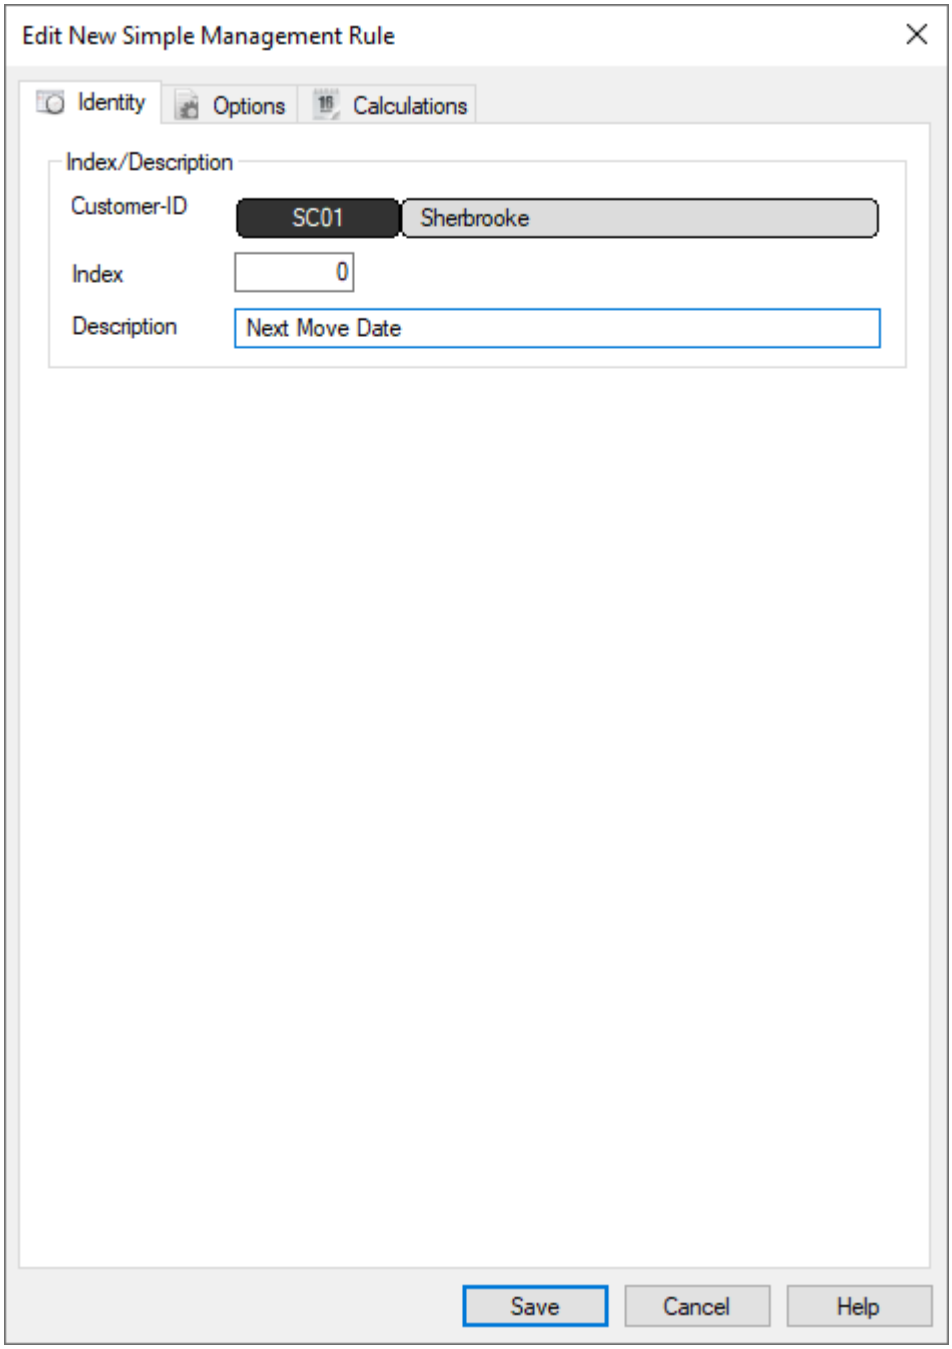

Creating The Rule

Select the required Customer and Media Type so that the Inventory is displayed in TapeMaster.

Select the `Simple Management` tab, right click and select `Add`.

Identity Tab

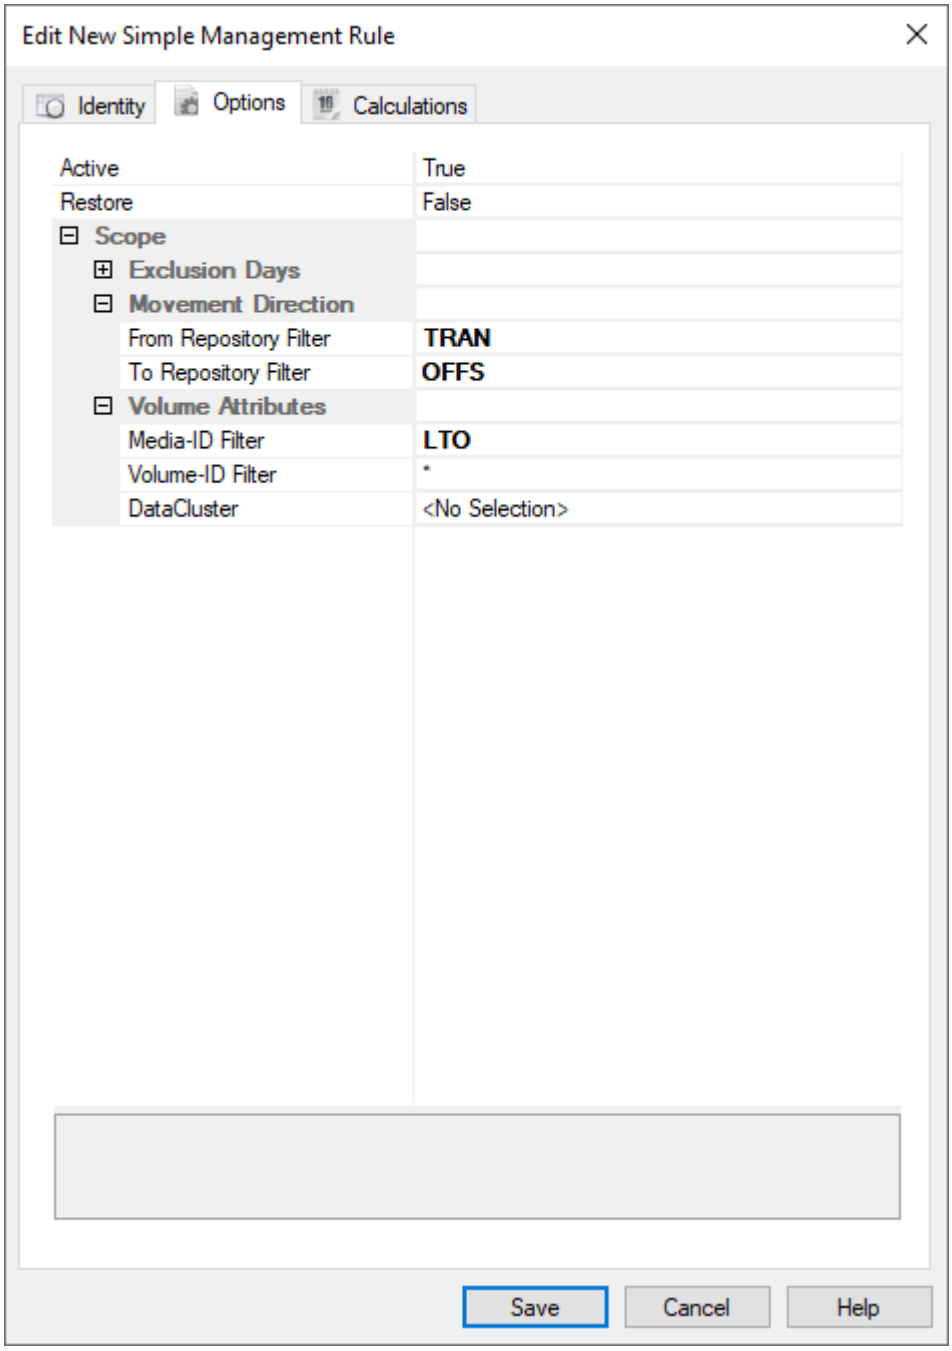

Add a description that matches the function or purpose of the rule.

Options Tab

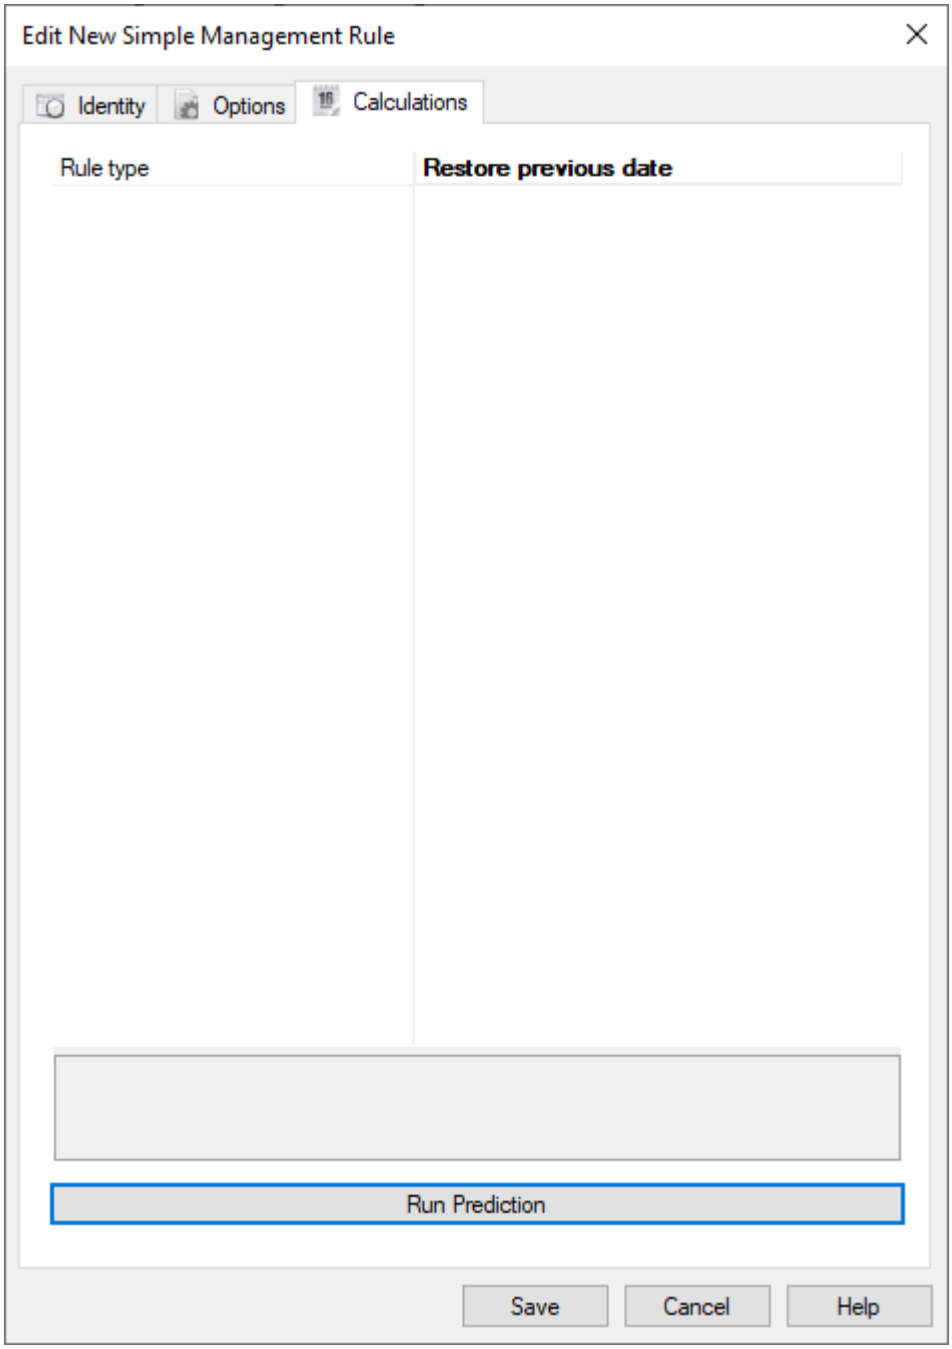

Add in filter values to limit the rule only functioning on the required Volumes.

In this example the target is LTO Volumes moving from TRAN to OFFS.

Calculations Tab

Set the `Rule Type` dropdown box to `Restore Previous Date`.

Save Rule

Click Save to commit the Simple Management Rule.

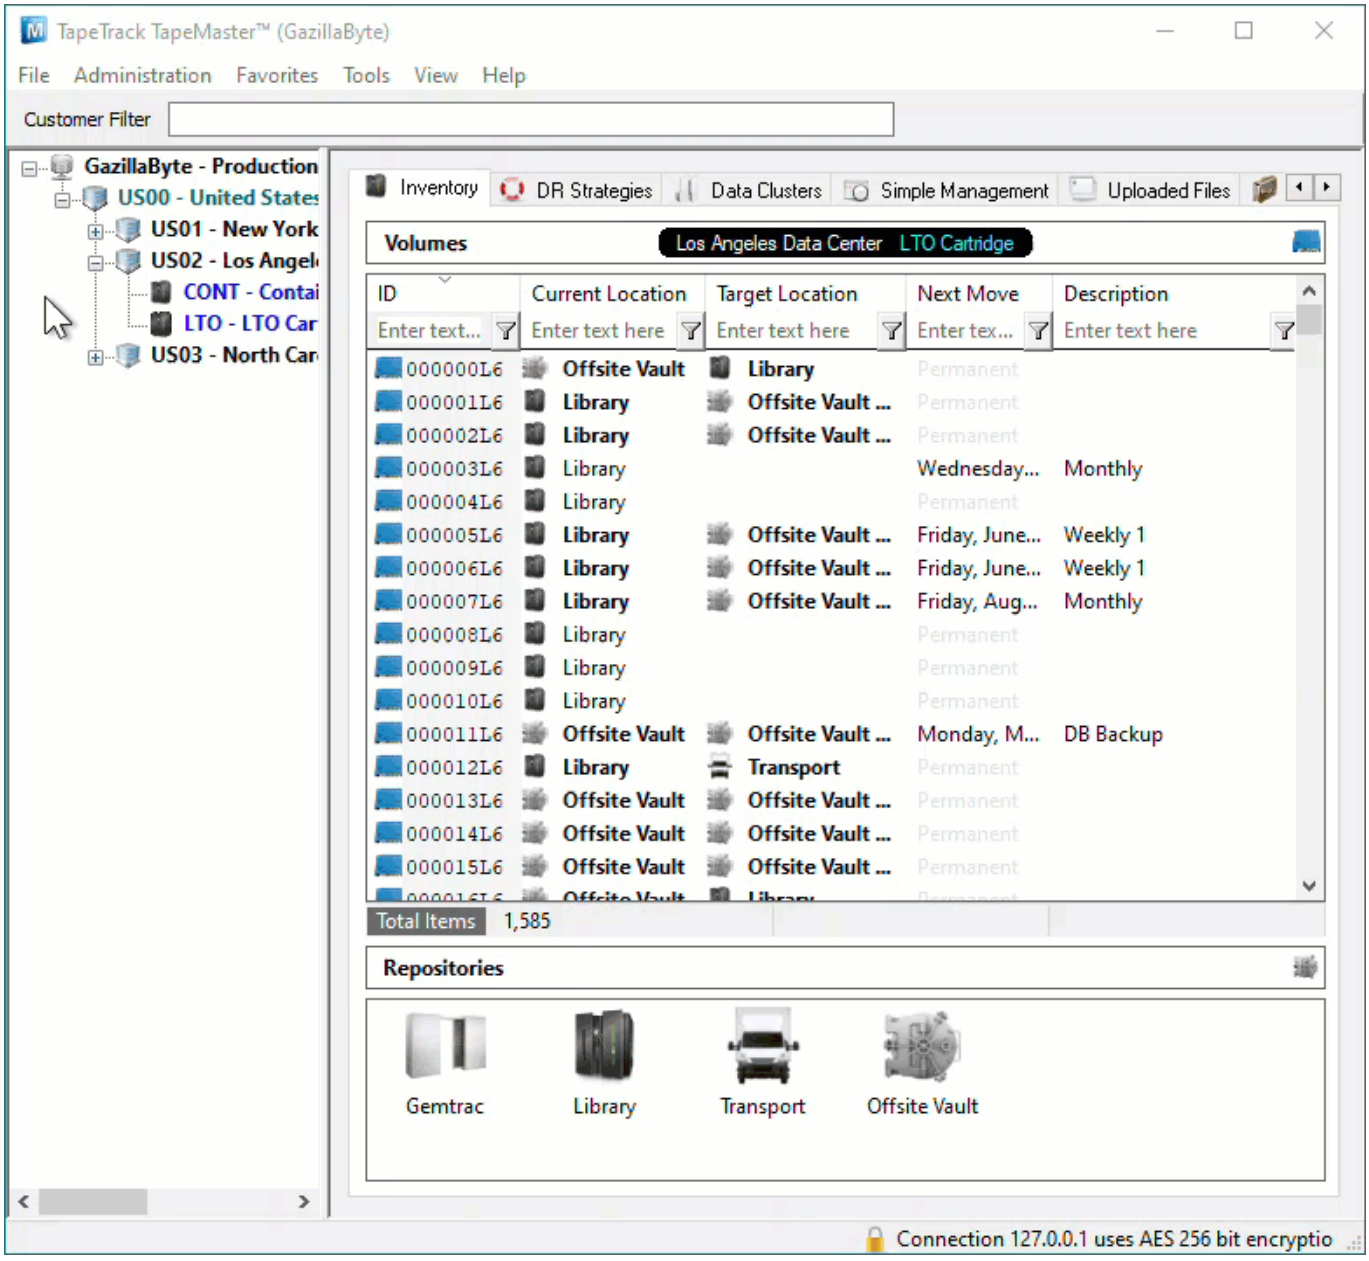

Enabling Simple Management Rule For Repository

Return to the `Inventory` tab.

Right-click on the Target Repository and select `Properties`.

Select the `Options` tab.

Set the option `Force Simple Management` to `True` and click `Save` to update.

update doco, simple management, next move
