

Restore Previous Date

Adding a Restore Previous Date Simple Management Rule to a Repository will maintain the Next Move Date currently applied to the Volumes.

Creating The Rule

Select the required Customer and Media Type so that the Inventory is displayed in TapeMaster.

Select the Simple Management tab, right click and select Add.

Identity Tab

Add a description that matches the function or purpose of the rule.

Options Tab

Add in filter values to limit the rule only functioning on the required Volumes.

In this example the target is LTO Volumes moving from TRAN to OFFS.

Edit New Simple Management Rule

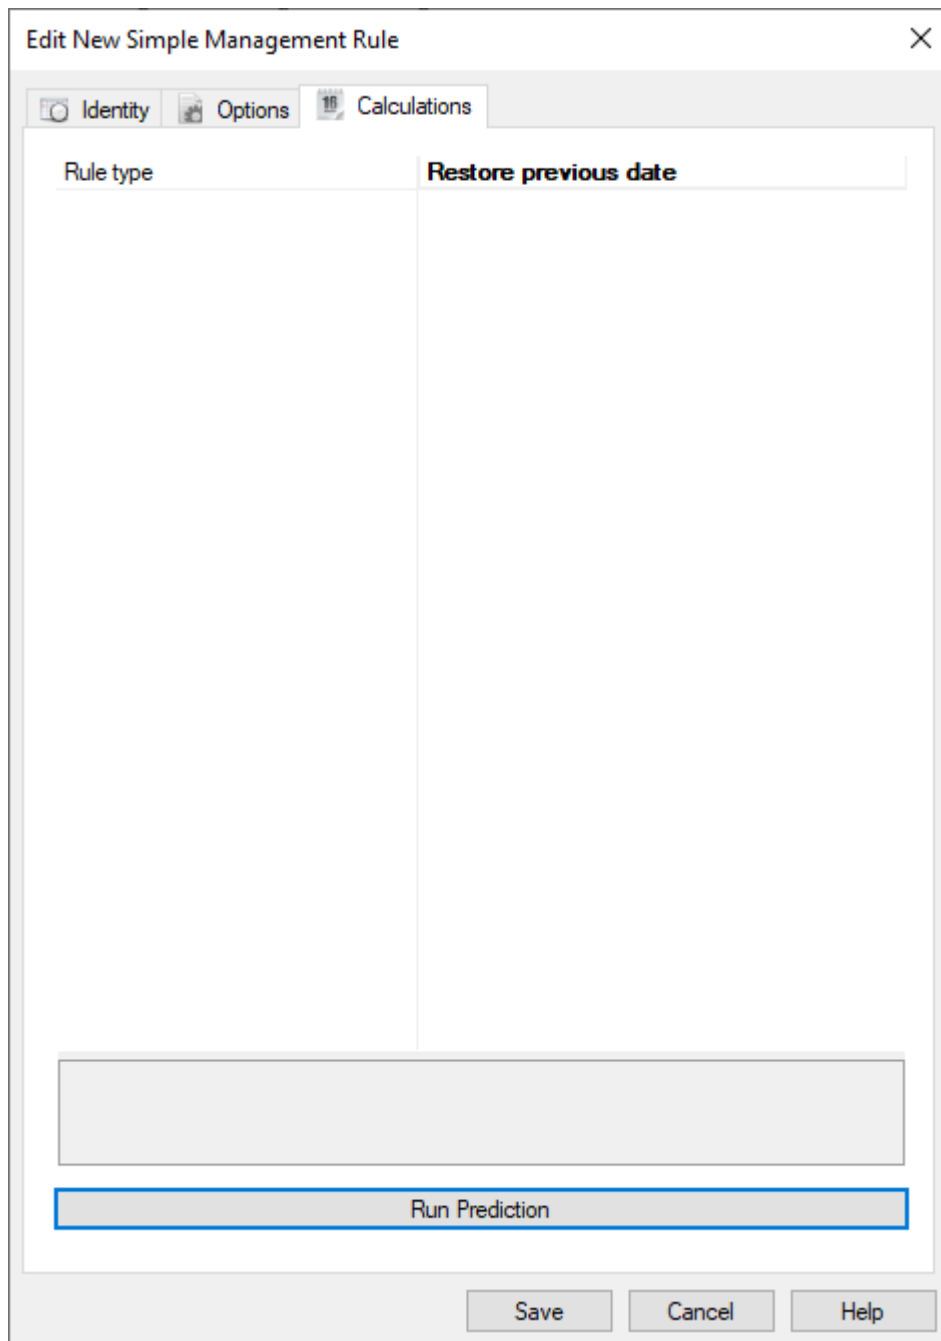

IdentityOptionsCalculations

Active	True
Restore	False

Volume-ID Filter	*
DataCluster	<No Selection>

SaveCancelHelp

Calculations Tab

Set the Rule Type dropdown box to Restore Previous Date.

Save Rule

Click Save to commit the Simple Management Rule.

Enabling Simple Management Rule For Repository

Return to the Inventory tab.

Right click on the Target Repository and select Properties.

Select the Options tab.

Set the option Force Simple Management to True and click Save to update.
