

Moving Volumes Back To Current Repository Before Confirming At Target repository

In this example we have a volume 000001L3 moving from the Current repository Library (LIBR) to Target repository Offsite (OFFS), with flags CMnNt (Confirmed, Moving, no slot, Description, Do not assign slot).

The screenshot shows a web application interface with a top navigation bar containing tabs: Inventory, DR Strategies, Data Clusters, Simple Management, Uploaded Files, and Consignments. Below this is a 'Volumes' section with a table. The table has columns: ID, Current Location, Target Location, Flags, Move Time, Due in, Container, and Next Move. Each column has a search filter icon. The table contains four rows of data, all with a blue volume icon on the left.

ID	Current Location	Target Location	Flags	Move Time	Due in	Container	Next Move
000001L3	Library	Offsite Vault	CMnNt	S17	Unspecified	Unassigned	Permanent
000001L5	Library	Offsite Vault	CMnNt	D4:21:58:19	Unspecified	Unassigned	Permanent
000002L5	Library	Offsite Vault	CGMnNt	D4:21:58:19	Unspecified	Unassigned	Permanent
000003L5	Library	Offsite Vault	CMnNt	D4:21:58:19	Unspecified	Unassigned	Permanent

Moving volume 000001L3 back to the repository Library (LIBR) without first confirming it at repository will evoke the **Failed Operations** window, displaying the error **Update OK but marked for followup**, volume ID, date and time.

The screenshot shows a 'Failed Operations' window with a red exclamation mark icon in the title bar. It contains a table with three columns: Error, Item, and Time. The first row of data shows a green circle icon, the error message 'Update OK, but marked for followup', the volume ID '000001L3', and the timestamp '2018-04-24 09:29:41'.

Error	Item	Time
Update OK, but marked for followup	000001L3	2018-04-24 09:29:41

From this window using the right click menu, volume ID's can be copied to windows clipboard or exported to file for further investigation at a later date.

This screenshot is similar to the previous one, but the row for volume 000001L3 is highlighted in blue. A right-click context menu is open over this row, showing three options: 'Export', 'Edit', and 'Copy'. A mouse cursor is pointing at the 'Copy' option.

Error	Item	Time
Update OK, but marked for followup	000001L3	2018-04-24 10:48:50

Click OK to close the **Failed Operations** window to continue.

Volume 000001L3 will now have a W (Warning) flag and be highlighted in Orange.

ID	Current Location	Target Location	Flags	Move Time	Due in	Container	Next Move
000001L3	Library		CnNtW		Unspecified	Unassigned	Permanent
000001L5	Library	Offsite Vault	CMnNt	D4:23:19:46	Unspecified	Unassigned	Permanent
000002L5	Library	Offsite Vault	CGMnNt	D4:23:19:46	Unspecified	Unassigned	Permanent
000003L5	Library	Offsite Vault	CMnNtZ	D4:23:19:46	Unspecified	Unassigned	Permanent

Any volume with a W flag will also change the Customer and Media type to display with the same orange background. This allows the operator to see there are currently volume/s with a warning flag without the need to expand each media type to check for orange volumes.

- US03 - North Carolina Data Center (446/6)
- US04 - Nashville Data Center (27/4)
- CONT - Container (1/1)
- LTO - LTO Cartridge (26/3)

ID	Current Location	Target Location
000001L3	Library	
000001L5	Library	Offsite Vault
000002L5	Library	Offsite Vault

The W flag can be removed by either:

- Selecting the volume by clicking on it in the Inventory window and pressing F2.
- Selecting the volume by clicking on it in the Inventory window, right click and select Special Operations → Modify → Flags. From the **Modify Flags** window, expand the Warning menu item and from the drop down menu item Value select **Remove Flag** and click Apply Updates to close the window and remove the W flag.

- Place the volume into a move status to a repository other than the current repository.

When all warning flags have been removed from volumes of a media type the orange highlighting of the Customer and media type will be removed when the customer tree is refreshed. To refresh manually, click in the customer tree window and press F5. If the customer has volumes in other media types with the warning flag, the orange highlighting will remain for those media types and customer ID.
