

Adding a Desktop Server Connection

When using the TapeTrack Desktop Software you will have to have one or more TapeTrack Framework Server entries defined so that you can connect to a server endpoint.

This can be done in the following ways:

1. Adding a connection interactively.
2. Adding a connection to the Configuration File.
3. Clicking on a URL.

Adding a connection interactively

Server Information

Server Name	My Server
Server Address	tapetrack.mycompany.com
Server Port	5000
Use HTTP Proxy	False
Use Single Sign-On	False

Server Address

TapeTrack Server name or IP address
Example 'tapetrack.mydomain.com' or '192.168.1.10'

OK

Cancel
