Adding Connection Settings via a Registry Import File

TapeTrack Desktop Connections are stored for each user in the Windows Registry.

To import new settings without having to manually enter the settings, you can use a file with an extension of .REG, i.e. sample.reg.

```
Windows Registry Editor Version 5.00

[HKEY_CURRENT_USER\Software\GazillaByte\ControlPanel\ServerList\My Company]
"HostName"="tapetrack.mycompany.com"
"Port"=dword:00001388
"ProxyEnabled"=dword:00000000
"NoMD5"=dword:00000000
"SSO"=dword:00000000
```
