

Adding Connection Settings via a Registry Import File

TapeTrack Desktop Connections are stored for each user in the Windows Registry.

To import new settings without having to manually enter the settings, you can use a file with an extension of .REG, i.e. sample.reg.

```
<sxh> Windows Registry Editor Version 5.00
```

```
[HKEY_CURRENT_USER\Software\GazillaByte\ControlPanel\ServerList\My Company]
```

```
"HostName"="tapetrack.mycompany.com" "Port"=dword:00001388
```

```
"ProxyEnabled"=dword:00000000 "NoMD5"=dword:00000000 "SSO"=dword:00000000 </sxh>
```
