Container Contents And Movements

Add Volumes To A Container

Volumes can be added to a container from the volumes inventory window, the containers properties window, excel import function or command line program TMSS10AssignContainer

Remove Volumes From Containers

Volumes can be removed from an assigned container from the volume inventory window, container inventory window, container properties window and automatically via repository property options.

Moving Volumes From One Container To Another

Volumes can be moved from their current container to another from the volume inventory window, container properties window, excel import function or command line program TMSS10AssignContainer
