Container Contents And Movements

Adding volumes to a container

Removing volumes from a container

Moving volumes from one container to another

Moving volumes with a container

Remove Volumes From Containers

Volumes can be removed from an assigned container from the volume inventory window, container inventory window, container properties window and automatically via repository property options.

Moving Volumes From One Container To Another

Volumes can be moved from their current container to another from the volume inventory window, container properties window, container assignment utility, excel import function or command line program TMSS10AssignContainer.

Moving Container Contents When Container Moves

Volumes can be set to move and confirm at target repository automatically when the container is moved. This process is managed through settings within the individual repository properties options tab.
