TMSSOfflineScanner

TMSSOfflineScanner allows the remote allocation of Slots to Volumes via the importation of a file extracted from the Framework Server database using the command line program TMSS10BatchSlotAllocation without the need for a direct database connection.

The updated Slot allocation is then exported to file to be read in by TMSS10BatchSlotAllocation, run in input mode.

TapeTrack Lite

TapeTrack Lite is a Windows Wizard that guides users with a minimal number of Volumes through the process of sending Volumes offsite and scanning them in when they return.

Supported Platforms

- Windows 7 and above.

Technical Support

TapeTrack Software is commercially supported by a full time help desk staff.

If you are experiencing problems or want some advice on how to configure or use the product, please see the Accessing Technical Support page.
