# AddAttributeResolution

Used with the program TMSS10Reconcile, a Volume's attribute value can be compared with the supplied string to identify that Volume's barcode. Allowing you to run a reconciliation using a Volume's attribute value instead of the barcode value.

## Phase

AddAttributeResolution(attribute index, attribute filter);

| Variable | Type | Description | Min Length | Max Length |
|---|---|---|---|---|
| attribute index | String | The attribute index number for comparison | 1 | 256 |
| attribute filter | String | The attribute filter for comparison | 1 | 256 |

## Example

Volume 100100L6, with a description of an alternate barcode IRM456789012

```
AddAttributeResolution(0, (????????????");
```
