AddExclusionOnValue

Exclude a record from processing if the record contains a value.

Phase

This instruction is used by the TapeTrack Import Engine.

Syntax

```
AddExclusionOnValue(field, filter, value);
```

string field;
string filter;
string value;

field	The field for this instruction.
filter	The filter value to test with.
value	The value to test against.

Example

AddExclusionOnValue: Do not process a record if the VOLUME field starts with CLN

```
AddExclusionOnValue(VOLUME, “CLN*”);
```
