

# AddExclusionOnValue

Exclude a record from processing if the record contains a value matching the filter.

## Phase

This instruction is used by the TapeTrack Import Engine.

## Syntax

```
AddExclusionOnValue(field, filter);
```

| Variable | Type   | Description                     | Min Length | Max Length |
|----------|--------|---------------------------------|------------|------------|
| field    | String | The field for this instruction. | 1          | 128        |
| filter   | String | The filter value to test with.  | 1          | 256        |

## Example

Do not process a record if the **VOLUME** field starts with CLN

```
AddExclusionOnValue(VOLUME, "CLN*");
```
