

# ChangeCase

Change the case of a field.

## Phase

This instruction is used by the TapeTrack Import Engine.

## Syntax

```
ChangeCase(field, type);
```

*string field;*

*string type;*

LOWER, UPPER, CAPITALIZED or INVERTED

| Variable | Type   | Description                                          | Min Length | Max Length |
|----------|--------|------------------------------------------------------|------------|------------|
| field    | String | The field for this instruction.                      | 1          | 128        |
| type     | String | The special string from the below Type Values table. | 1          | 10         |

### Type Values

| Value       | Description                                                                                                 |
|-------------|-------------------------------------------------------------------------------------------------------------|
| LOWER       | The data in the field will be converted to lower case.                                                      |
| UPPER       | The data in the field will be converted to upper case.                                                      |
| CAPITALIZED | The data in the field will be converted so that the first letter of each word is capitalized.               |
| INVERTED    | The data in the field will be converted so that any upper case character will be lower case and vice versa. |

## Example

To change the Description value my description value to My Description Value

```
ChangeCase(DESCRIPTION, CAPITALIZE);
```

import engine
