

conditionalembed

## ConditionalEmbed

Conditionally embed a file containing additional definition language elements.

### Phase

This instruction is used by the TapeTrack INI Engine.

**ConditionalEmbed**(*filepath*, *filter*, *value*);

*string filepath*;  
*string filter*;  
*string value*;

|          |                                                             |
|----------|-------------------------------------------------------------|
| filepath | The full or relative path to a file that you wish to embed. |
| filter   | A filter value.                                             |
| string   | A string value to be compared against the filter value.     |

### Example

**ConditionalEmbed: Embed a file if the current day is Monday or Tuesday.**

|                                                                 |
|-----------------------------------------------------------------|
| SetVar2Date(TODAY, "*", "%A");                                  |
| ConditionalEmbed("montue_ttidef", "(Monday Tuesday)", \$TODAY); |
