SetCSVDelimiter

Set the delimiter to be used in CSV processing and instruct the engine to process each record as CSV.

Phase

This instruction is used by the TapeTrack Import Engine.

Syntax

```
SetCSVDelimiter(delimiter);
```

character *delimiter;*

delimiter	The delimiter to be used when parsing a CSV file. This is usually a comma (“,”).

Example

SetCSVDelimiter: Parse a CSV file using a comma as the delimiter.

```
SetCSVDelimiter(“,”);
```

import engine, sync engine
