SetCSVDelimiter

Set the delimiter to be used in CSV processing and instruct the engine to process each record as CSV.

Phase

This instruction is used by the TapeTrack Import Engine.

Syntax

```
SetCSVDelimiter(delimiter);
```

Variable	Type	Description	Min Length	Max Length
delimiter	String	The delimiter to be used when parsing a CSV file. This is usually a comma (“,”).	1	1

Example

Parse a CSV file using a comma as the delimiter.

<sxh> SetCSVDelimiter(“,”); </sxh>
