setfile

SetFile

Set the path to the source text file.

Phase

This instruction is used by the TapeTrack Import Engine.

Syntax

SetFile*(filepath);*

string *filepath;*

filepath	Path to the file that will be processed. If no SetFile and no SetODBC specified engine will default to stdin.

Example

SetFile: Set the input file to c:\data\tapetrack\control-t.txt.

```
SetFile("c:\data\tapetrack\control-t.txt");
```
