

setliteral

## SetLiteral

Set a field to a literal value.

### Phase

This instruction is used by the TapeTrack Import Engine.

### Syntax

**SetLiteral**(*field*, *value*);

string *field*;  
string *value*;

|       |                            |
|-------|----------------------------|
| field | The field name to set.     |
| value | The field value to be set. |

### Example

**SetLiteral: Set field REPOSITORY to literal ACME.**

```
SetLiteral(REPOSITORY, "ACME");
```
