

# SetRemoveCharacters

Remove unwanted characters from a field.

## Phase

This instruction is used by the TapeTrack Import Engine.

## Syntax

```
SetRemoveCharacters(field, characters);
```

string *field*;

string *characters*;

|            |                                                                            |
|------------|----------------------------------------------------------------------------|
| field      | Field to have characters removed.                                          |
| characters | A string listing all of the characters that should be removed for a field. |

## Example

Remove dashes and commas from a field.

```
<sxh> SetRemoveChars("-","); </sxh>
```

Remove plus symbol and quotation marks.

```
<sxh> SetRemoveChars("+`"); </sxh>
```
